

— AI PRODUCT MANAGER

30+ Interview Questions

Can you answer all of them?

These are the exact questions hiring managers ask in AI PM interviews at top tech companies. Most candidates don't know what they don't know until they see these.

Product Thinking

AI Strategy

Data and Models

Unit Economics

Ethics, Risk and Crisis

Product Thinking & Decision Making

USER
SIGNAL

ANALYZE
DATA

WEIGH
TRADE-OFFS

SHIP
DECISION

- 01 85% accurate in 6 weeks vs 99% in 5 months. Which do you ship, and how do you determine the right threshold?
- 02 Users say they "don't trust AI" in surveys, but it's your most-used feature. How do you act on this contradiction?
- 03 Your AI improves outcomes for 94% of users but worsens them for 6%. Do you ship?
- 04 Copilot (AI assists) vs Agent (AI acts autonomously). How do you choose the right model for your use case?
- 05 3 months post-launch: enterprise renewals are 15% lower for your AI feature users. What's happening?
- 06 A competitor just released a free version of your core AI feature. What is your immediate product response?
- 07 User research directly contradicts your behavioral data. Which do you trust, and what do you do next?

AI Strategy & Roadmapping

BUILD
IN-HOUSE

BUY
VENDOR

FINE-
TUNE

EXECUTE
ROADMAP

- 01 CTO wants GPT-4o, ML team wants to fine-tune Llama, a vendor pitches a vertical model. How do you decide?
- 02 A competitor releases a model 3x better and 40% cheaper. You are 3 months into your 18-month roadmap. Now what?
- 03 ML team has capacity for ONE project: +6% accuracy, -45% latency, or a new customer-requested feature. How do you prioritize?
- 04 Your entire roadmap was built around a capability OpenAI just deprecated overnight. What do you do?
- 05 Strong product-market fit in one segment, poor or negative fit in three others. Do you focus or expand?
- 06 Narrow specialized AI product vs broad AI platform. How do you structure this strategic decision?
- 07 How do you design a data flywheel that turns user interactions into a competitive moat no one can replicate?

Data & Model Strategy

COLLECT
DATA

TRAIN
MODEL

EVALUATE
QUALITY

DEPLOY
TO PROD

- 01 ML team says "the model needs more training data." How do you evaluate if that's even the right diagnosis?
- 02 Training data is 78% from one demographic. The model underperforms for everyone else. How do you fix this?
- 03 Your model returns different predictions for the same input depending on the day of the week. Why and how do you fix it?
- 04 An enterprise customer offers proprietary training data in exchange for a discount. How do you evaluate this offer?
- 05 Your offline benchmark improved 7% but user satisfaction in production has not moved at all. Why?
- 06 AI outputs are sometimes brilliant, sometimes terrible. Average scores look fine. How do you catch this pattern?
- 07 ML proposes routing 80% of queries to a cheap model and complex ones to an expensive model. How do you evaluate?

Unit Economics & Pricing

INFERENCE
COST

UNIT
ECONOMICS

PRICING
STRATEGY

GROSS
MARGIN

- 01 AI feature costs \$2.40 per query. Product priced at \$49/month. Power users run 80 queries/month. How do you fix this?
- 02 GPT-5 gives 8% better quality but costs 12x more than GPT-4o. Do you upgrade?
- 03 Your AI startup burns \$80K/month on inference. MRR is \$45K. You have 6 months of runway. What do you cut first?
- 04 How do you price a new AI feature that uses significantly more compute than the rest of your product?
- 05 An enterprise prospect says your AI is too expensive compared to hiring a human expert. How do you respond?
- 06 Gross margin is declining because inference costs grow faster than revenue per user. What levers do you pull?
- 07 You need to justify hiring 5 ML engineers (\$600K/year) to your CFO. How do you build the business case?

Ethics, Risk & Crisis Management

DETECT
ISSUE

INVESTIGATE
ROOT CAUSE

CONTAIN
AND FIX

RESTORE
TRUST

- 01** Day 3 of rollout: your AI legal assistant cited a nonexistent case. A partner emails 50 colleagues. Next 72 hours?
- 02** Two weeks before launch: AI hiring tool shows 14% lower recommendation rate for women with career gaps. Ship?
- 03** Sales told customers your AI "never makes mistakes." You found out after 3 enterprise failures. What do you do?
- 04** A board member asks: "How do we know the AI won't do something catastrophic?" How do you answer?
- 05** OpenAI just launched a direct competitor: better reasoning, MS integration, 30% cheaper. You have 800 customers. Your plan?
- 06** Your AI companion for elderly users has a user who believes the AI is her late husband. Her health improved. Response?
- 07** Your largest customer (28% of revenue) demands a feature to secretly record employee meetings for HR. What do you say?
