

AI PM PLAYBOOK

Stop using ChatGPT like Google.

The best AI Product Managers don't ask better questions.

They give better commands.

7 commands that instantly improve your AI workflow.

How can I help you today?

Message ChatGPT...

It's not about better AI.

It's about better instructions.

⊗ Most people

"What is RAG?"

⚡ Gets information.

💡 Learns faster.

✓ Great PMs

"Challenge whether RAG is even the right solution."

⚡ Gets better decisions.

🎯 Thinks better.

👉 *The quality of your prompts becomes the quality of your thinking.*

Foundation Commands

These save hours every week.

TL;DR

Summarize long documents

EXAMPLE

“Summarize this PRD into five bullets for executives.”

Compare

Evaluate tradeoffs clearly

EXAMPLE

“Compare MCP vs A2A across architecture, use cases and limitations.”

Step-by-Step

Turn complexity into action

EXAMPLE

“Turn this feature into a two-week implementation plan.”

Executive Summary

Communicate upward

EXAMPLE

“Rewrite this update for leadership in under 150 words.”

Improve

Polish your work

EXAMPLE

“Rewrite these user stories with clearer acceptance criteria.”

Thinking Commands

These improve judgment, not just output.

First Principles

Break assumptions apart

EXAMPLE

"Break this roadmap into first principles."

Devil's Advocate

Pressure-test ideas

EXAMPLE

"Argue why we shouldn't build this feature."

Find Blind Spots

Reveal hidden risks and gaps

EXAMPLE

"What risks and edge cases am I missing?"

80/20

Focus on what moves the needle

EXAMPLE

"What 20% of features create 80% of customer value?"

Socratic Method

Think through the problem

EXAMPLE

"Don't answer yet. Ask me questions until you fully understand the problem."

AI Power Commands

Where ChatGPT starts acting like a teammate.

Role-play

Simulate the room

EXAMPLE

“Act as a Staff Product Manager reviewing my roadmap.”

Brainstorm

Expand, then refine

EXAMPLE

“Generate 20 onboarding ideas before ranking the best five.”

Feynman Technique

Explain to understand

EXAMPLE

“Explain vector databases so I could teach a new PM.”

ELI5 → ELICollege

Adjust the depth

EXAMPLE

“Explain RAG at beginner, intermediate and expert levels.”

☆ HIDDEN GEM

Ask Questions First

Before answering, ask me every question you need so your recommendation is as accurate as possible.

My favorite command

I use this every single day.

〰

Act as a Principal Product Manager. Challenge my roadmap, identify weak assumptions, missing metrics, stakeholder risks, engineering concerns, and suggest a stronger version. Ask clarifying questions before answering.

Turns AI into a strategic partner

Surfaces what I can't see

Leads to stronger decisions

Saves hours of back-and-forth

Better prompts don't just create better answers.

They create better Product Managers.
