16 Claude Skills for **Marketing**

*(The exact stack we run to turn Claude into a marketing team
— every skill linked to the source inside.)*

WHAT'S INSIDE:

- Strategy & research — ground every move in reality 5 SKILLS
- Content & copy — words that read like a human 5 SKILLS
- Visual & media — assets without the bottleneck 2 SKILLS
- Search & discoverability — get found by people and AI 4 SKILLS

+ The full workflow, chained, inside

Audrey Chia
Close With Copy

Sixteen skills. Four jobs.

One workflow.

Each skill is a slash command. Point it at a job, feed it your context, and it works like a specialist who has done it a hundred times.

01 **Strategy & research** **5 SKILLS**

Ground positioning, messaging, and the plan in reality.

02 **Content & copy** **5 SKILLS**

Turn strategy into words that read like a human wrote them.

03 **Visual & media** **2 SKILLS**

Get images and video out of the bottleneck.

04 **Search & discoverability** **4 SKILLS**

Make sure the right people — and machines — find you.

GET THEM ALL

github.com/coreyhaines31/marketingskills · [draft-content](#) ↗

STEP 1 · CLONE

Grab the repo above. One folder, sixteen skills.

STEP 2 · INVOKE

Call a skill by its slash command, then hand it your context.

STEP 3 · BRAND IT

The sharper your input, the sharper the output. That's the work.

01

Strategy & research.

Get the foundation right before a single word ships.

SECTION 01 / 04

/customer-research ↗

SKILL 01

Uncover what customers actually think, feel, and struggle with — so positioning and copy are grounded in reality, not assumption.

Use when *you're guessing at pain points instead of quoting them back.*

github.com/coreyhaines31/marketingskills/skills/customer-research ↗

/product-marketing ↗

SKILL 02

Build one positioning-and-messaging context doc that every other skill references — so you never repeat yourself.

Use when *your messaging drifts across every asset.*

github.com/coreyhaines31/marketingskills/skills/product-marketing ↗

/marketing-psychology ↗

SKILL 03

Apply mental models and behavioral principles to understand why people buy — and how to influence action, ethically.

Use when *the funnel looks fine but nobody converts.*

github.com/coreyhaines31/marketingskills/skills/marketing-psychology ↗

/marketing-plan ↗

SKILL 04

Produce an executable 12-month plan structured by AARRR — tuned to your real budget, team, and stage.

Use when *you have tactics but no throughline.*

github.com/coreyhaines31/marketingskills/skills/marketing-plan ↗

/marketing-ideas ↗

SKILL 05

Pull from a library of 139 proven plays to find the right moves for your stage and resources.

Use when *the pipeline's dry and you're out of moves.*

github.com/coreyhaines31/marketingskills/skills/marketing-ideas ↗

02

Content & copy.

Where strategy becomes words on a page.

SECTION 02 / 04

/copywriting ↗

SKILL 06

Write conversion copy that is clear, compelling, and built to drive action.

Use when a page gets traffic but not signups.

github.com/coreyhaines31/marketingskills/skills/copywriting ↗

/draft-content ↗

SKILL 07

Generate drafts tailored to a specific content type, audience, and brand voice.

Use when you're staring at a blank doc on deadline.

github.com/anthropics/knowledge-work-plugins/marketing/skills/draft-content ↗

/cold-email ↗

SKILL 08

Write cold emails that sound like a sharp, thoughtful human — not a sales machine following a template.

Use when your outbound reads like everyone else's.

github.com/coreyhaines31/marketingskills/skills/cold-email ↗

/social ↗

SKILL 09

Build social content that grows an audience, drives engagement, and serves the goal behind it.

Use when you post consistently but it goes nowhere.

github.com/coreyhaines31/marketingskills/skills/social ↗

/lead-magnets ↗

SKILL 10

Plan magnets that capture emails, qualify leads, and lead naturally into the product — like the one you're reading.

Use when traffic arrives and leaves without a trace.

github.com/coreyhaines31/marketingskills/skills/lead-magnets ↗
