

A dashboard is unfinished until it changes a decision.

Visibility is useful. A decision path is strategic.

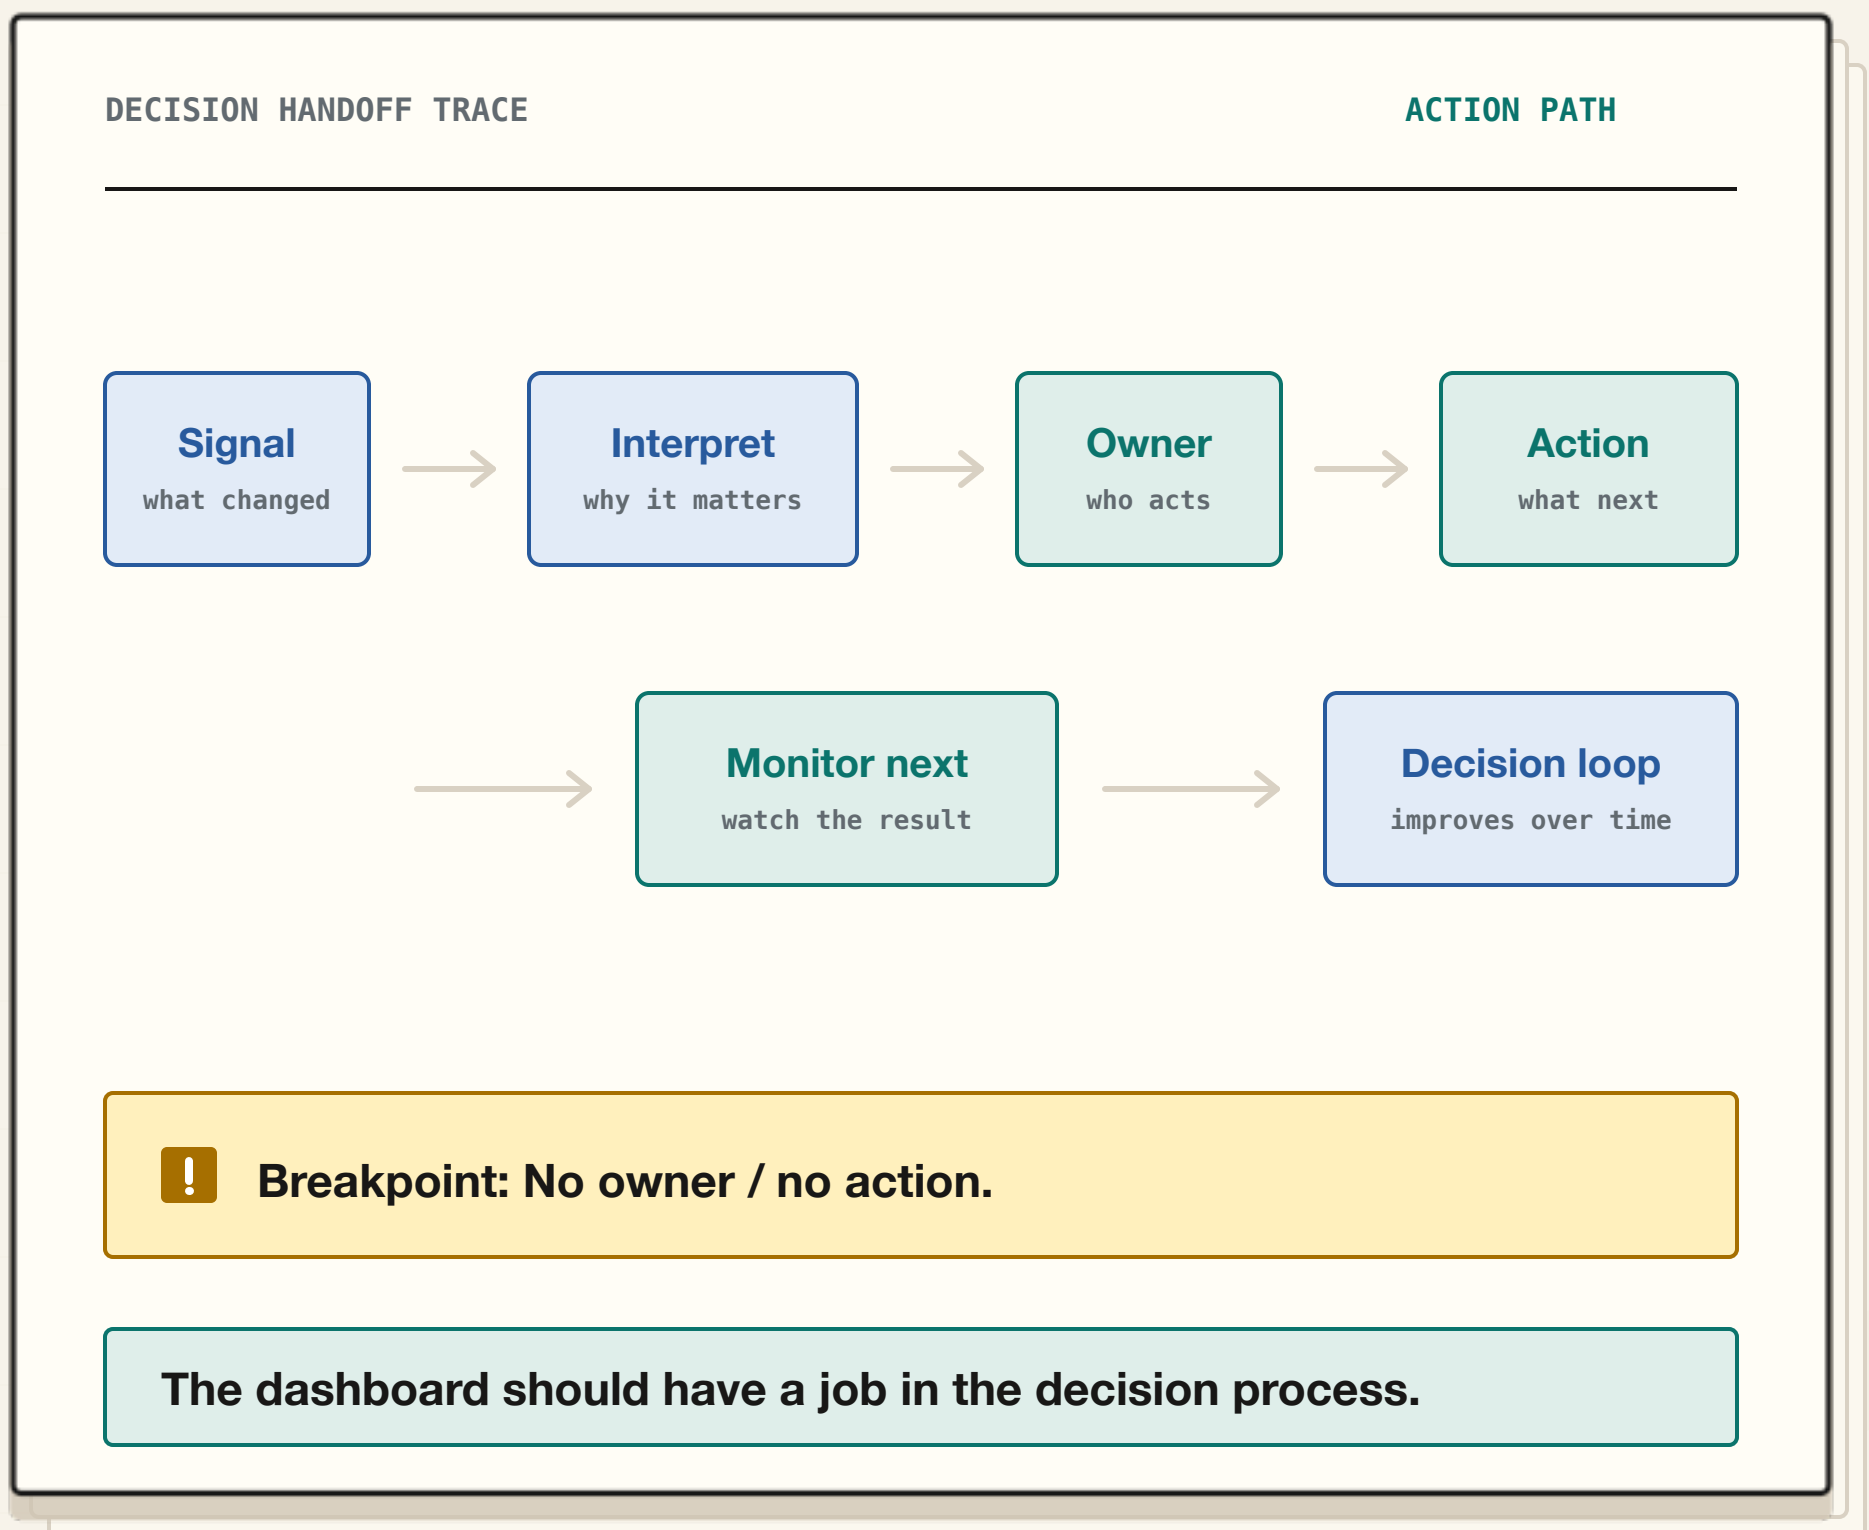

Too many dashboards stop at "what happened?"

The next step stays unclear.

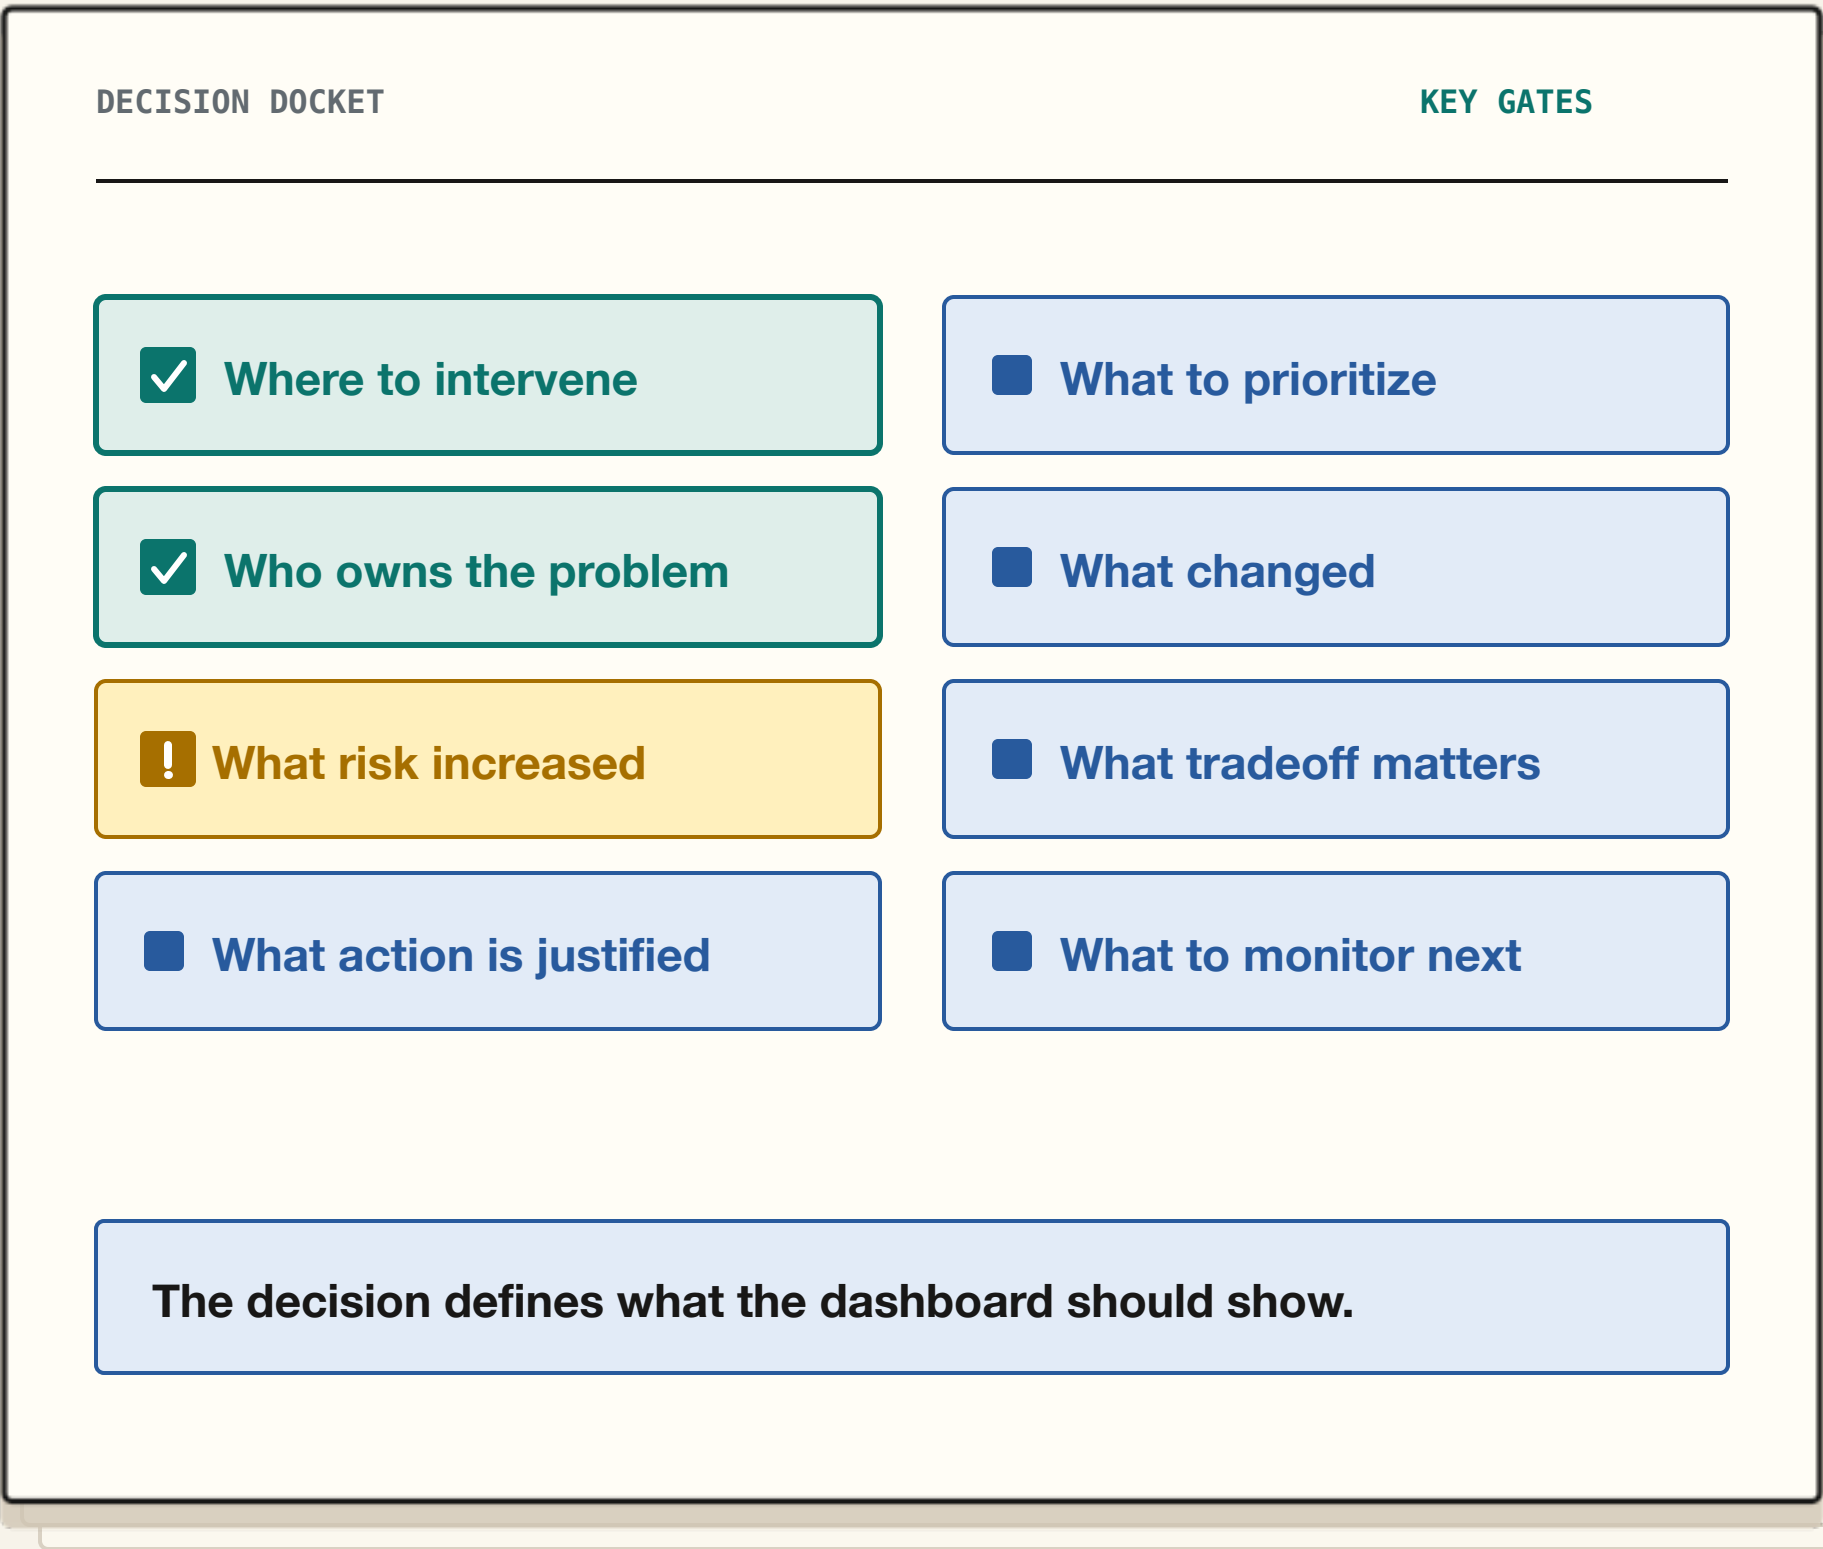

A useful dashboard clarifies the next move.

The path should run from signal to ownership to action.

Design around the decision.

Make the dashboard clarify prioritization, ownership, and action.

What dashboard should be rebuilt around a decision?

Name the dashboard where visibility is not enough.

DECISION RESET PROMPT

Dashboard:

name the dashboard

Decision it should improve:

name the decision path
