

TRANSFORM YOUR GITHUB PROFILE IN 1 MINUTE

1 Prompt Claude Does Everything Profile Transformed

Paste one prompt. Claude Chrome Extension automatically opens your GitHub, edits your README, adds everything, and saves it. You do nothing.

What AI Adds Automatically	
Animated Typing Header	Your role, tagline with typing animation
Professional About Section	Who you are, what you do, your passion
Tech Stack Badges	All your technologies with colored icons
Social Media Links	YouTube, Medium, Instagram, LinkedIn with stats
GitHub Stats Card	Stars, commits, PRs, streak graph
GitHub Trophies	Achievement trophies on your profile
Visitor Counter	Shows how many people viewed your profile
Contribution Graph	Visual snake animation of your contributions

Tool	Website	Cost
Google Chrome	google.com/chrome	FREE
Claude Chrome Extension	Chrome Web Store	FREE
GitHub Account	github.com	FREE

"1 Prompt. 1 Minute. From empty to impressive. AI does everything."

Why Your GitHub Profile Matters

Your GitHub profile is the first thing a recruiter or hiring manager sees when they search for you. An empty profile with just your username and a few repos tells them nothing. A well-designed profile with animated headers, tech badges, stats, and social links tells them everything — who you are, what you do, what you are passionate about, and how active you are.

Empty profile vs Professional profile:

Empty Profile	Professional Profile
Just username and repos	Animated greeting + role description
No about section	Professional about section with personality
No tech info visible	Full tech stack with colored badges
No social presence	YouTube, Medium, Instagram links with stats
No activity proof	GitHub stats, streak, trophies visible
Recruiter skips in 2 seconds	Recruiter stays, explores, messages you

The good news: you can transform your empty profile into a professional one in just 1 minute using Claude Chrome Extension. One prompt — Claude does everything automatically. No coding needed. No markdown knowledge needed. Just paste and watch.

STEP 1

Install Claude Chrome Extension

If you already have Claude Chrome Extension installed, skip to Step 2. If not, follow these steps:

1 Open Google Chrome browser

This only works in Google Chrome. If you use another browser, switch to Chrome.

2 Go to Chrome Web Store

OPEN THIS LINK

<https://chromewebstore.google.com>

3 Search 'Claude' and install

Search for 'Claude' in the Chrome Web Store. Find the official extension by Anthropic. Click 'Add to Chrome'. Click 'Add extension' in the popup. Done.

4 Sign in to Claude

Click the Claude icon in Chrome toolbar. Sign in with your account. If you do not have one, create a free account.

Tip: Pin the Claude extension to your toolbar — click puzzle icon, find Claude, click pin.

☐ **Claude Chrome Extension is ready. Next step: set up your GitHub.**

STEP 2

Create Your GitHub Profile Repository

GitHub has a special feature: if you create a repository with the SAME NAME as your username, the README.md of that repository becomes your profile page. This is where all the magic happens.

1 Go to GitHub

OPEN THIS LINK

<https://github.com>

Log in to your GitHub account.

2 Check if profile repo already exists

Go to: github.com/YOUR-USERNAME/YOUR-USERNAME (replace YOUR-USERNAME with your actual GitHub username). If the repository exists, you are ready — skip to Step 3. If it says '404 Not Found', you need to create it.

3 Create the profile repository (if it does not exist)

- Click the '+' button (top right corner of GitHub)
- Select 'New repository'
- Repository name: type YOUR EXACT USERNAME (must match exactly)
- Keep it Public
- Check 'Add a README file'
- Click 'Create repository'

GitHub will show a message: 'YOUR-USERNAME/YOUR-USERNAME is a special repository — its README.md will appear on your profile.' This confirms you did it correctly.

The repository name MUST exactly match your username. If your username is 'jayanthbabu3', the repo name must be 'jayanthbabu3'. Case sensitive.

☑ **Profile repository is ready. Now the magic begins.**

STEP 3

Open Your Profile & Customize the Prompt

Before pasting the prompt into Claude, you need to customize it with YOUR details. Open the prompt on the next page and replace all the [BRACKETS] with your actual information.

What you need to fill in:

Field	Example	Your Value
[YOUR NAME]	Jayanth Babu	Write yours
[YOUR ROLE]	Frontend Developer	Write yours
[X] years experience	3 years	Write yours
[YOUR TECH STACK]	React, TypeScript, Node.js	List your skills
[YOUTUBE URL]	youtube.com/@yourchannel	Your link (or remove)
[YOUTUBE SUBSCRIBERS]	3,000	Your count (or remove)
[MEDIUM URL]	medium.com/@yourprofile	Your link (or remove)
[MEDIUM FOLLOWERS]	6,000	Your count (or remove)
[INSTAGRAM URL]	instagram.com/yourhandle	Your link (or remove)
[INSTAGRAM FOLLOWERS]	30,000	Your count (or remove)
[LINKEDIN URL]	linkedin.com/in/yourname	Your link
[PORTFOLIO URL]	yourwebsite.com	Your link (or remove)

Tip: If you don't have YouTube or Medium or Instagram, simply remove those lines from the prompt. Only include what you actually have.

Tip: Copy the prompt into a Notepad first, fill in your details there, then paste the complete prompt into Claude.

The Prompt — Copy This Entire Text

After filling in your details (Step 3), copy this entire prompt and paste it into Claude Chrome Extension.

PROMPT PART 1 — Copy this AND Part 2 together

COPY THIS ENTIRE PROMPT (Part 1 of 2) >>>

I want you to transform my GitHub profile README.
Do NOT ask me any questions. Just execute everything.

MY DETAILS:

- Name: [YOUR NAME]
- Role: [YOUR ROLE]
- Experience: [X] years
- Tech Stack: [LIST YOUR TECHNOLOGIES]
- YouTube: [YOUR YOUTUBE URL] - [X] subscribers
- Medium: [YOUR MEDIUM URL] - [X] followers
- Instagram: [YOUR INSTAGRAM URL] - [X] followers
- LinkedIn: [YOUR LINKEDIN URL]
- Portfolio: [YOUR WEBSITE URL]

INSTRUCTIONS - DO ALL OF THIS AUTOMATICALLY:

1. Go to my GitHub profile repository
(github.com/[username]/[username])
Open the README.md file
Click Edit (pencil icon)
2. Delete ALL existing content
3. Create and paste this complete README:

SECTION A: ANIMATED HEADER

- Add a wave GIF greeting
- Add animated typing effect using
readme-typing-svg showing my role
and a tagline

SECTION B: ABOUT ME

- Write a short confident intro
- Mention my content creation
(YouTube, Medium, Instagram)
- Add 3-4 fun bullet points about me
- Use relevant emojis

PROMPT PART 2 — Copy both parts together as ONE prompt

```
## PROMPT CONTINUED (Part 2 of 2) >>>

SECTION C: TECH STACK
- Add shields.io badges for ALL my technologies
- Use colored badges with logos
- Organize by: Frontend, Backend, Tools

SECTION D: SOCIAL MEDIA LINKS
- YouTube badge with subscriber count
- Medium badge with link
- Instagram badge with follower count
- LinkedIn badge with link
- All badges must be clickable links

SECTION E: GITHUB STATS
- GitHub Stats Card (anuraghazra/github-readme-stats)
- GitHub Streak Stats (github-readme-streak-stats)
- Top Languages Card
- Theme: tokyonight or radical

SECTION F: GITHUB TROPHIES
- GitHub Profile Trophy (ryo-ma/github-profile-trophy)
- Theme: darkhub or onedark

SECTION G: VISITOR COUNTER
- Add komarev profile views counter badge at top

SECTION H: FOOTER
- Let's Connect section with all social links
- Professional closing line

4. After pasting all content, click Commit changes
   to save automatically

RULES:
- Do NOT ask any questions. Just do it.
- Do NOT stop in the middle. Complete everything.
- Use my actual GitHub username in all URLs.
- Make sure all badge URLs are correct.
- Make it modern, clean, and professional.

## <<< END OF PROMPT
```

IMPORTANT: Copy BOTH Part 1 and Part 2 together as ONE single prompt. Do not send them separately.

Replace ALL [BRACKETS] with your actual information before pasting.

STEP 4

Paste Prompt & Watch the Magic

This is the exciting part. You paste the prompt, press Enter, and Claude does EVERYTHING automatically. You just watch.

1 Go to your GitHub profile page

Open github.com/YOUR-USERNAME in Chrome.

2 Click the Claude extension icon

Click the Claude icon in Chrome toolbar (top right). The Claude sidebar opens.

3 Paste the entire prompt (with your details filled in)

Paste the complete prompt (Part 1 + Part 2 together, with your details filled in) into the Claude chat box. Press Enter.

4 Sit back and watch

Claude will now automatically:

- Open your GitHub profile repository
- Click on README.md file
- Click the Edit button (pencil icon)
- Delete existing content
- Type the complete new README with all sections
- Add animated typing header
- Add about section
- Add tech stack badges
- Add social media links with stats
- Add GitHub stats cards
- Add trophies
- Add visitor counter
- Click 'Commit changes' to save

This entire process takes about 1-2 minutes. You do NOT need to touch anything. Just watch Claude work.

Tip: If Claude pauses or asks a question, just type 'continue' and press Enter.

STEP 5

Check Your New Profile

After Claude finishes and saves the README, go check your profile:

1 Open github.com/YOUR-USERNAME in a new tab

2 Refresh the page

3 See your transformed profile!

You should now see:

- Animated typing header with your role
- Professional about section
- Colored tech stack badges for all your technologies
- Social media links (YouTube, Medium, Instagram, LinkedIn) with stats
- GitHub stats card showing your stars, commits, PRs
- GitHub streak stats
- Top languages card
- GitHub trophies
- Visitor counter badge

If something needs changing:

Go back to the Claude extension and just tell it what to change in plain English:

- 'Change the theme to dark mode'
- 'Add Docker and Kubernetes to my tech stack'
- 'Remove the Instagram link'
- 'Make the about section shorter'
- 'Change the stats theme to radical'

Claude will automatically make the change and save it. No manual editing needed.

Troubleshooting – Common Issues

Problem	Solution
Claude is not opening my GitHub repo	Make sure you are on github.com when you open the Claude extension
Profile repo does not exist	Go back to Step 2 and create it. Repo name MUST match your username exactly
Badges are not showing	Refresh the page. Badges take a few seconds to load from shields.io
GitHub stats card shows wrong username	Tell Claude: 'Fix the username in stats cards to [your-username]'
Claude stopped in the middle	Type 'continue' and press Enter. Claude will resume from where it stopped
README looks broken	Tell Claude: 'The README has formatting issues. Please fix and save again'
Want different theme/colors	Tell Claude: 'Change theme to [dark/radical/tokyonight/merko]'
Want to add more sections	Tell Claude what to add. Example: 'Add a Recent Projects section'

Quick Reference — Entire Process on One Page

Step	What To Do	Time
1	Install Claude Chrome Extension (if not installed)	2 min
2	Create GitHub profile repo (username/username)	1 min
3	Fill in your details in the prompt template	2 min
4	Open your GitHub profile in Chrome	5 sec
5	Click Claude extension icon	2 sec
6	Paste the complete prompt	5 sec
7	Press Enter — sit back and watch	0 sec
8	Claude opens repo, edits README automatically	30 sec
9	Claude adds all sections automatically	30 sec
10	Claude saves (commits) automatically	5 sec
11	Refresh your profile — DONE!	2 sec

Total active time: Under 5 minutes (most of it is Claude working automatically)

**Before: Empty profile. No one notices.
After: Professional, animated, impressive.
Same person. Same experience. 1 prompt.**

**Your GitHub profile is your coding first impression.
Transform it today.**
